Madhav Gupta

Cloud Engineer | DevOps | SRE

+91-7000467594 | madhavgupta0594@gmail.com | linkedin.com/in/madhavgupta | github.com/madhav6412 | Ujjain, Madhya Pradesh, India

PROFESSIONAL SUMMARY

Cloud Engineer, DevOps Engineer and Site Reliability Engineer (SRE) with 4+ years in cloud infrastructure, cloud operations, automation and production support on Azure and AWS. Hands-on with Kubernetes (AKS, EKS), Docker, Helm, ArgoCD, GitOps, Terraform, Bicep and IaC; CI/CD with Jenkins, GitHub Actions and Bitbucket Pipelines; and observability with Prometheus, Grafana, Sumo Logic, Zabbix, Catchpoint and Azure Monitor. Experienced in root cause analysis (RCA), post-mortems, SLIs/SLOs, MTTR reduction, high availability, disaster recovery, automation scripting (Python, Bash, PowerShell), Linux administration and ITSM tools (ServiceNow, JIRA). Supports enterprise ThingWorx IIoT platform deployments for global clients.

CORE COMPETENCIES

Azure Kubernetes Service (AKS) | Kubernetes & Docker | Terraform / Bicep IaC | CI/CD & GitOps (ArgoCD, Helm) | Prometheus / Grafana Observability | SLIs / SLOs & Root Cause Analysis | Multi-Region Azure & AWS | Python / Bash / PowerShell Automation

WORK EXPERIENCE

Velotic

Oct 2026 - Present

Specialist Cloud Applications Engineer (Cloud / DevOps / SRE)

Multi-region Azure/AWS, enterprise ThingWorx IIoT platform for global clients (ThingWorx business acquired by Velotic effective 01 Oct 2026)

Remote (Work From Home)

- Architect, deploy and manage multi-region Azure and AWS cloud infrastructure supporting enterprise ThingWorx IIoT platform deployments for global clients, maintaining 100% compliance with corporate security and governance standards.
- Design modular, reusable Terraform and Bicep (Infrastructure as Code) templates to standardize cloud resource provisioning across production and non-production environments, cutting deployment cycle time by 30%.
- Build and maintain CI/CD pipelines using Jenkins, Git and Bitbucket Pipelines, enabling zero-downtime, repeatable releases for global engineering teams; deploy Kubernetes workloads using Helm and ArgoCD (GitOps).
- Manage Kubernetes clusters (AKS, EKS) and containerized applications; troubleshoot pods, networking, ingress, load balancing and scaling issues in production.
- Key member of the DevSecOps team supporting 100+ application teams across Wireline and Wireless domains, provisioning and managing Azure environments through Cloud Provisioner, a Terraform- and Helm-based automation tool, and reducing manual provisioning efforts.
- Track and resolve tickets and change requests using ServiceNow and JIRA; automate routine cloud operations using Python, Bash and PowerShell.

Parametric Technology Corporation (PTC)

Oct 2025 - Sep 2026

Specialist Cloud Applications Engineer (Cloud / DevOps / SRE)

Enterprise ThingWorx IIoT platform for global clients.

Remote (Work From Home)

- Authored and maintained Terraform modules for Azure infrastructure and Helm charts for Kubernetes application deployments.
- Onboarded new MSAI Kubernetes instances on Azure Kubernetes Service (AKS) and developed CI/CD pipelines for multiple frontend and backend applications.
- Implemented Global IP/cross-subscription load balancer functionality in Cloud Provisioner.
- Collaborated with application teams to understand requirements and assess automation feasibility, set up build agents on AKS, and managed Jenkins builds and deployments as per release schedules.
- Developed Ansible playbooks to automate the installation of Maven, GitLab, Java, and Node.js on Azure VMs.
- Managed NSGs and Azure RBAC/Managed Identity for secure cross-network access, along with certificate management using Azure Key Vault and Azure DNS.
- Supported DAST security reviews and provided remediation recommendations for Apache security headers.
- Built New Relic alerts, dashboards, and NRQL-based metrics, and collaborated with development teams to define SLAs, SLIs, and SLOs.

Parametric Technology Corporation (PTC)

Mar 2022 - Sep 2025

Cloud NOC Engineer (promoted from Cloud NOC Engineer Associate)

24/7 cloud operations across Azure and AWS.

Remote (Work From Home)

- Managed 24/7 cloud operations and NOC monitoring across hybrid Linux (RHEL, Ubuntu) and Windows Server environments on Azure and AWS, eliminating unscheduled downtime.
- Developed Bash and PowerShell automation scripts for routine system administration and cloud lifecycle health checks, saving 10+ hours of manual effort per week.

- Configured telemetry thresholds, monitoring and alert policies in Zabbix and Sumo Logic, reducing false-positive alert noise by 25% and improving incident response time.
- Sustained 99%+ uptime through proactive monitoring, log analysis and automated health-check alerts, reducing SLA breach risk by 30%.
- Handled L1/L2 incident escalations and authored Kubernetes operational runbooks and SOPs; collaborated with core engineering teams to resolve production performance bottlenecks under tight deadlines.

MR Softwares

Nov 2019 - Mar 2022

Systems Administrator & Support Executive

Enterprise IT infrastructure and end-user support.

Ujjain, India

- Administered internal enterprise IT infrastructure including servers, networks, hardware and end-user systems, achieving a 95% first-contact resolution rate.
- Managed IAM (user access, roles and permissions) and automated data backup schedules, sustaining 99.5% uptime across server and network environments.

PROJECTS

Automated Enterprise Infrastructure Provisioning

IaC

Built reusable Terraform modules to automate Azure VNet, resource group and RBAC deployment with strict state management and variable validation; standardized IaC adoption across teams.

Terraform, Azure, Bicep, ARM Templates

Containerized Microservices on AKS

Kubernetes

Containerized legacy workloads with Docker and deployed on Azure Kubernetes Service using custom Helm charts and IaC modules; integrated Prometheus and Grafana for real-time metrics and autoscaling.

Kubernetes, Docker, Helm, Prometheus, Grafana

Operations Automation Suite

Authored scripts for log management, disk cleanup and health checks, reducing manual intervention by about 5 hours per week.

Bash, PowerShell, Python

EDUCATION

B.Sc. in Computer Science Future Vision College, Vikram University — 2018

Ujjain, India

Computer Science, graduated June 2018

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals Microsoft — 2024

AWARDS & HONORS

Cloud Network Automation Champion Parametric Technology Corporation 2025

SKILLS

Cloud Platforms: Microsoft Azure, AWS, Hybrid Cloud, Multi-Cloud, Azure AKS, Azure VNet, Azure Entra ID, Azure Monitor, Azure Load Balancer, AWS EC2, AWS EKS, AWS IAM, AWS CloudWatch

Infrastructure as Code: Terraform, Bicep, ARM Templates, Terraform Modules, State Management, IaC, Cloud Automation, Cloud Provisioning

CI/CD & GitOps: Jenkins, GitHub Actions, Bitbucket Pipelines, Git, ArgoCD, Helm, GitOps, Zero-Downtime Deployment

Containers & Orchestration: Kubernetes, AKS, EKS, Docker, Helm Charts, Microservices, Container Orchestration, Autoscaling

Monitoring & Observability: Prometheus, Grafana, Sumo Logic, Zabbix, Catchpoint, Azure Monitor, CloudWatch, Alerting, Log Analysis, Telemetry, Dashboards, Synthetic Monitoring

SRE & Operations: Site Reliability Engineering, Incident Management, RCA, Post-Mortem, SLI, SLO, SLA, MTTR, High Availability, 24x7 NOC, Production Support, Runbooks, SOPs

Scripting, OS & ITSM: Python, Bash, Shell Scripting, PowerShell, SQL, Linux (RHEL, Ubuntu), Windows Server, Networking, IAM, RBAC, ServiceNow, JIRA, ThingWorx, IIoT, Change Management
